### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Josh Elliott on January 19, 2006.

The application has been amended as follows:

Claims 31-38 have been canceled.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: Torrence et al. US 4,515,781 (Torrence) is the closest related prior art. Torrence teaches the incorporation of morpholino nucleotides into nucleic acids of Formula (I) which is embraced by the instant claims; however, in order to conclude a finding of obviousness, several factors must be weighed. The variable Z of Formula (I) is described very broadly, reading upon hydrocarbon chains substituted with alcohols, esters, ethers, acids, sterols, alkenes, amino acids, amines, aromatic hydrocarbons, nitriles, and other functionalities. Torrence teaches a nearly infinite number of variations, which would encompass millions of compounds. Additionally, Torrence does not teach a specific compound embraced by the instant invention. Thus, Torrence does not render the instant method obvious.

Art Unit: 1623

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
